

# HIPAA Compliance Report

Prepared by VLayer Automated Scan

## Project Information

**Target Path:** /Users/simonfranco/Projects/vlayer-demo-nextjs/src

**Organization:** Not specified

**Report Generated:** 6/16/2026, 12:20:23 AM

**Files Scanned:** 2

## Scan Summary

25 current findings across 20 entries  
+ 1 upcoming requirement (NPRM — proposed rule)

**Compliance Score: 0/100 (Grade F)**

Status: critical

# Findings by Location

25 current findings across 20 entries — grouped by file, line & control family.

|          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

## Upcoming Requirements

NPRM — proposed rule, not yet in effect

These reference the proposed 2026 HIPAA Security Rule (NPRM). They are not current obligations and are excluded from the severity summary above. They will apply if and when the rule is finalized.
